COLOUR SELECTION GUIDE

As Canada's Premier Skylight Manufacturer, we pride ourselves on providing you with the most comprehensive selection in daylighting products. Please consider this guide when selecting final framing finishes on your new skylight.

BASE COLOUR

Every skylight has a standard base colour which we call Mill Finish. Mill Finish is actually not a powder coating or anodizing but rather the bare colour of aluminum.

Why do we call it Mill Finish? Because the aluminum comes straight from the mill, no finishes in between. Along with its natural colour comes any minor blemishes or marks. But don't worry, it still looks really sharp, we promise.

If Mill Finish isn't quite the colour you are looking for, use the selectors on the next pages to help guide you.

CUSTOM COLOURS

Most times we can get pretty close to the colour required with our options below. But in those times of exceptions, we can custom match almost any colour required. A paint sample will be required so we can get as close as possible.

SKYLIGHT DOMES
RESIDENTIAL & COMMERCIAL SKYLIGHTS

STANDARD COLOUR OPTIONS

POWDERCOATING

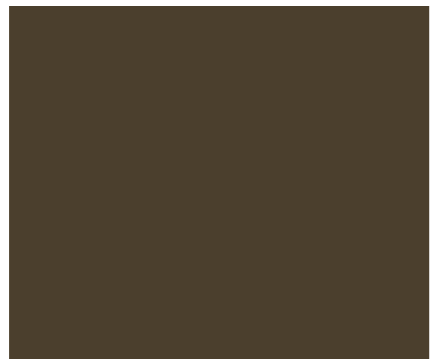

MATTE BLACK
CODE: MAGIC BLACK

On par with current trends, Matte Black is by far our most popular option. Simple, elegant, luxurious, timeless.

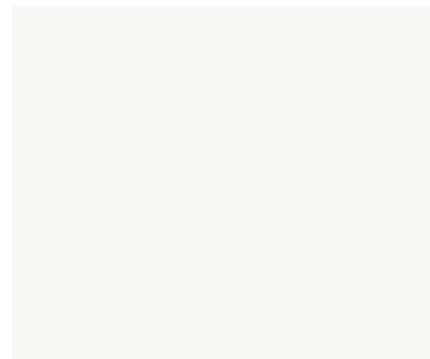

DARK GRAY
CODE: ANCIENT LAVA

A popular colour that fits well with almost any colour of roofing/aluminum trim. This dark gray provides a medium gloss sheen.

COMMERCIAL BROWN
CODE: COMMERCIAL BROWN

Who says retro is dead? Popular since the 80's, Commercial Brown is still very much a great option to compliment any design feature.

FLAT WHITE
CODE: SEASHELL WHITE

Extremely popular for the interior of skylights. Can be used in union with our Magic Black colour. Low gloss, matching most ceilings.

SOMETHING TO THINK ABOUT

**OUR CHOICES OF
POWDERCOATING
COLOURS CAN BE
APPLIED TO BOTH
THE EXTERIOR AND
INTERIOR OF YOUR
SKYLIGHT.
PERHAPS CHOOSE
TWO COLOURS AND
SEE WHAT HAPPENS.**

SOMETHING TO THINK ABOUT

OUR CHOICES OF ANODIZING COLOURS ARE APPLIED TO BOTH THE EXTERIOR AND INTERIOR OF YOUR SKYLIGHT. A CLEAN, LONG LASTING FINISH USED FOR ULTIMATE LONGEVITY OF YOUR SKYLIGHT.

STANDARD COLOUR OPTIONS

ANODIZING

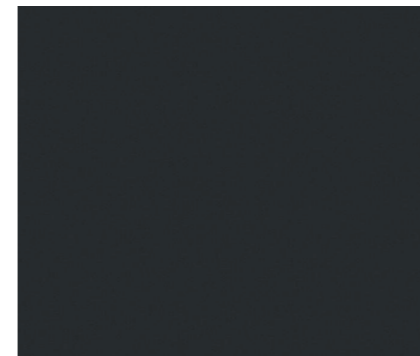

CLEAR ANODIZED
CODE: N/A

The standard for all anodizing, making it the most popular. Satin look reveals deep aluminum colour. Performance is the main purpose.

BRONZE ANODIZED
CODE: N/A

A deep, rich, satin bronze colour that amplifies the look of any skylight. Inside and out.

BLACK ANODIZED
CODE: N/A

Similar to our Magic Black, Black Anodizing provides a high performance attribute along with its good looks.

TO BE CONSIDERED

Anodizing is an electrochemical process that converts the metal surface into a decorative, durable, corrosion-resistant, anodic oxide finish. Aluminum is most commonly used for anodizing.*

Although visually appealing, the main purpose of its usage is to extend the lifespan and aesthetic appearance of the aluminum metal exterior framing.

This method is preferred by most building professionals as it adds protection to your investment.
